Office Action Summary	Application No. 10/785,489	Applicant(s) BABA ET AL.	
	Examiner Camie S. Thompson	Art Unit 1774	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed May 25, 2007 are acknowledged.
2. The objection to the specification is withdrawn due to applicant's submission of a new abstract.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-6 are rejected under 35 U.S.C. 102(a) as being anticipated by JP 2004-039579, hereinafter the Japanese reference.

The Japanese reference discloses an organic electroluminescent device that comprises a color filter layer, a transparent protecting layer, which has a convex-concave lenticular lens element so that the convex-concave shaped, is arranged corresponding to a pixel array (see abstract). The figures disclosed in the reference show a sectional view of the image display device comprising a transparent base, a black matrix, a color filter layer, a coloring layer (color conversion layer), a transparent protective layer comprising a lenticular lens element that has a convex-concave surface and a transparent electrode layer. The Japanese reference also discloses that the device comprising an insulating layer (barrier layer). Paragraph 0050 discloses a liquid coating on the transparent protection layer.

Response to Arguments

5. Applicant's arguments filed May 25, 2007 have been fully considered but they are not persuasive. Applicant argues that the Japanese reference does not disclose the pitch. The present claims recite a transparent protecting layer that has a convex-concave lenticular lens element and a color filter, as does the Japanese reference. The manner in which the convex-concave surface is formed does not add any patentable weight to the claims. Both the Japanese reference and the present claims comprise the same components. See MPEP 2113. The rejection is maintained.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
